#### VIII. Methodology

#### A CPR Methodology

Constant Repayment Rate (CPR) measures prepayments, both voluntary and involuntary, for a trust student loan pool in the given period.

$$CPR = 1 - \left(1 - \frac{UPP}{SEP}\right)^{(12)}$$

Unscheduled Principal Payments (UPP) = Borrower Payments - Scheduled Principal and Interest Payments Scheduled Ending Principal (SEP) = Beginning Pool Balance - Scheduled Principal and Interest Payments

Pool Balance = Sum(Principal Balance + Interest Accrued to Capitalize Balance)

Since Issuance Constant Prepayment Rate (TCPR) measures prepayments, both voluntary and involuntary, for a trust student loan pool over the life of the transaction. For each trust distribution, the actual month-end pool balance is compared against a month-end pool balance originally projected at issuance assuming no prepayments and defaults. For purposes of Since-Issued CPR calculations, projected period end pool balance assumines in-school status loans have up to a six month grace period before moving to repayment, grace status loans remain in grace status until their status end date and then move to full principal and interest repayment, loans subject to interim interest or fixed payments during their in-school and grace period continue paying interim interest or fixed payments until full principal and interest repayment status, and that no trust loan in full principal and interest repayment status to any other status.

Since Issuance CPR = 
$$1 - \left(\frac{APB}{PPB}\right) \left(\frac{12}{MSC}\right)$$

APB = Actual period-end Pool Balance

PPB = Projected period-end Pool Balance assuming no prepayments and no defaults

Pool Balance = Sum(Principal Balance + Interest Accrued to Capitalize Balance)

MSC = Months Since Cut-Off

#### B Overcollateralization Percentage Methodology

The notes Overcollateralization Percentages are calculated in the following manner:

Class A Overcollateralization % [Pool Balance - Class A Note Balance (Post Distribution)] / [Pool Balance]

Class B Overcollateralization % [Pool Balance - Class A Note Balance (Post Distribution) - Class B Note Balance (Post Distribution)] / [Pool Balance]

Class C Overcollateralization % [Pool Balance - Class A Note Balance (Post Distribution) - Class B Note Balance (Post Distribution) - Class C Note Balance (Post Distribution)] / [Pool Balance]
